

TWO STORIES OF NATURE, ONE LANGUAGE OF DESIGN.

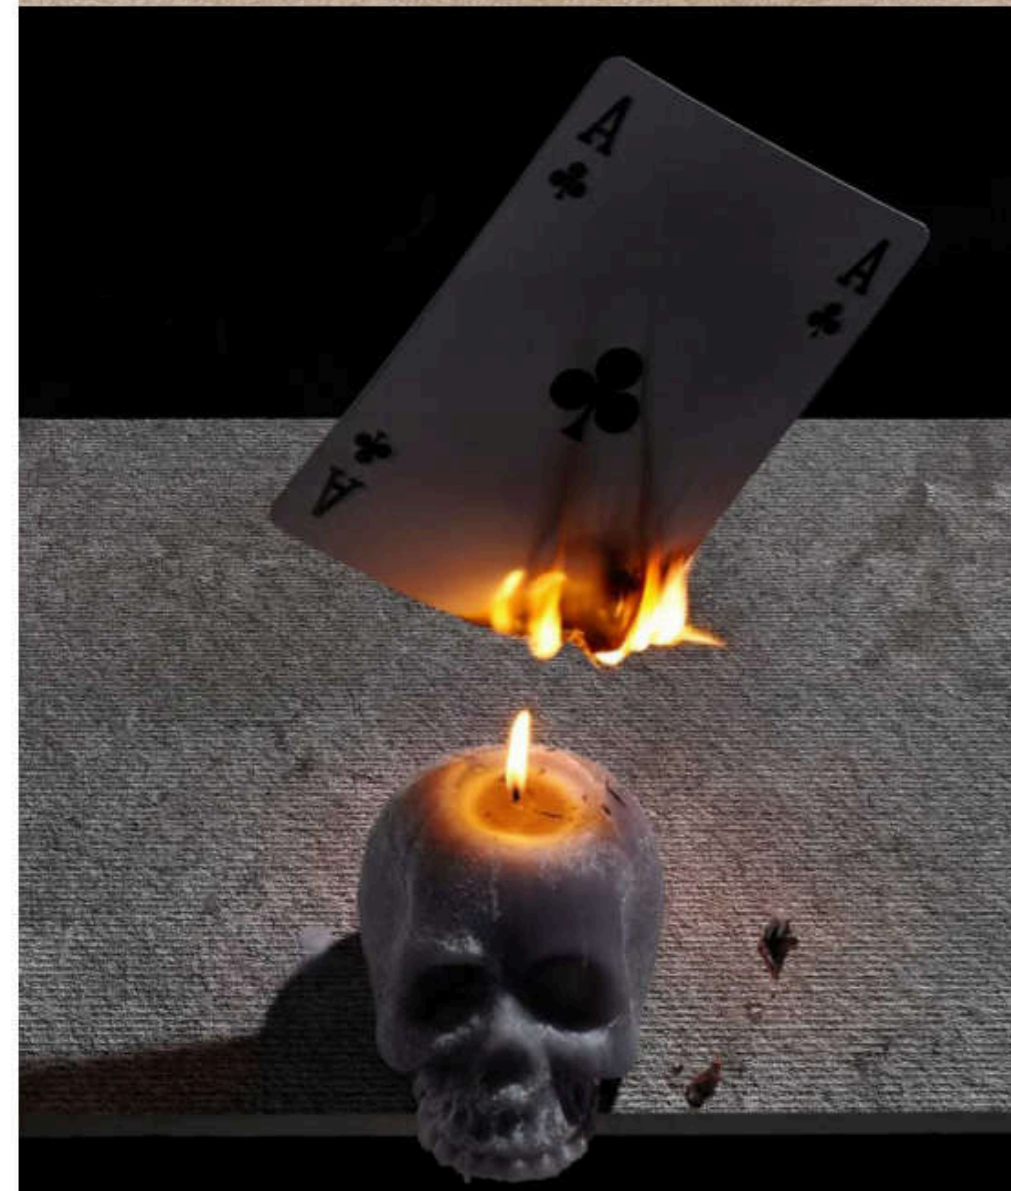

Travertino, Seastone & Greenland reflect two distinct forces of nature: stone shaped by time and stone shaped by tide. One born from layered earth, the other sculpted by coastal winds and sand. Together, they create a balanced palette of texture, warmth, and natural movement giving architects the freedom to build spaces that feel grounded, calm, and undeniably timeless.

ENGINEERED TO WITHSTAND THE UNEXPECTED.

Whether it's fire, weight, or sudden impact, GHR PRO absorbs stress with ease. Its solid, non-porous body ensures long-lasting performance and visual consistency.

CRAFTED DEPTH, PURE STONE.

These three series pair refined base surfaces with precision linear-punch décor, creating depth without disturbing the natural calm of stone.

The base offers a smooth, timeless foundation, while the décor introduces subtle engraved texture that lifts the design with shadow, rhythm, and visual structure.

Together, they deliver a modern stone aesthetic that feels crafted, architectural, and perfectly balanced for contemporary spaces.

TRAVERTINO

Travertino brings the quiet elegance of natural stone in **two timeless tones—Beige and Grey**. The smooth base surface offers a calm, uniform foundation, while the crafted décor adds subtle linear texture that enhances depth and light play.

Together, they create a balanced expression of nature and detail, allowing designers to build refined spaces with warmth, structure, and modern architectural clarity.

SEASTONE

Seastone captures the raw, weathered beauty of coastal stone and brings it into architecture through three refined tones—Aria, Bianco, and Dark. The smooth base surface offers a calm, natural foundation, while the crafted décor adds soft grain textures that mimic the erosion of wind and water. Together, they create a balanced interplay of depth and serenity, allowing designers to build spaces that feel grounded, textural, and effortlessly modern.
